

AC5201 CARAVAN AND HOME AIR CONDITIONER

The Eurom AC5201 is the perfect solution for your caravan or motorhome during warmer days. With the highest power on the market at 4500-5200 BTU / 1525 W, this split-unit air conditioner is ideal for medium-sized caravans and motorhomes, and can effectively cool rooms up to 40 m³. So you enjoy a comfortable indoor climate.

With its modern and compact design, it fits well in any caravan. The built-in timer is adjustable from 0.5 to 7.5 hours. The clear display ensures that you can always clearly read the temperature. The caravan air conditioner can be operated via the remote control, the control panel or via the Eurom smart app. Connect the caravan air conditioner to Wifi and control it from a distance, making sure that when you return it is nice and warm.

This caravan air conditioner offers more than just cooling for your caravan or motorhome, the AC5201 can also be used at home, just mount the indoor and outdoor unit on top of each other and attach the drain hose and lead it outside!

Included is an adapter for the Eurom Window Way-Out, with this accessory you can run the exhaust hose through any tiltable window to expel the warm air! The perfect addition to use the AC5201 at home too!

Product number	382532
EAN	8713415382532
Suitable for space	living room, bedroom, study/office, at the camping
Powered by	electric
Cooling capacity	1525 W, 4300-5200 BTU
Power consumption	550-585W, 565-585W
