## Dimmable LED Downlight

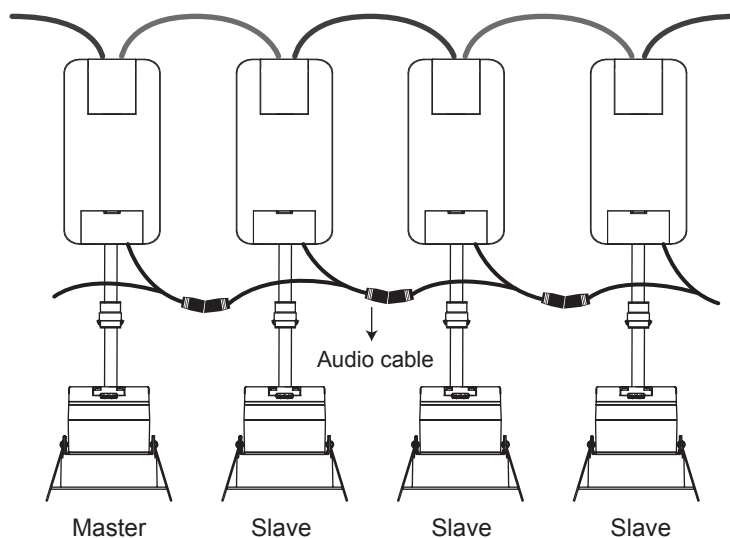

RGB 3W CCT 8W 2700K-5000K  
220-240V 50/60Hz 350mA 550lm

## Instruction manual

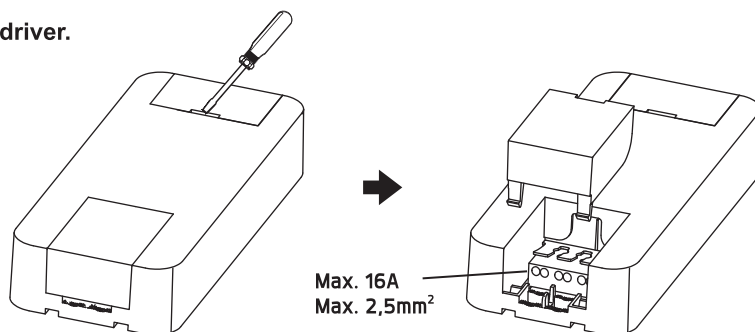

1. Install the downlights according to the manual by professional electricians, all the downlights will blink to search the Hue Bridge when power on.
2. Download the Philips APP "HUE" from Apple store or Google Play
3. Connect the Philips Hue Bridge to the home Router and connect the WIFI from the Router
4. Open the HUE app and start the auto search according to the instructions of the Hue Bridge
5. If the downlights are added to the HUE APP successfully, then the downlights will stop blinking, and groups can be made.
6. If any bugs happen, turn on and off the power 5 times in succession to restore factory default settings, and then the downlights will start blinking again.
7. The sound of the master and slave downlights are connected by audio cables, connect the device name of the master downlights by bluetooth with the mobile phones or other devices.
